January 19, 2011

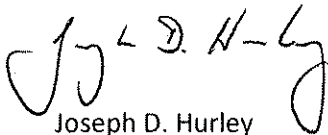

Dear Parent or Guardian:

The purpose of this letter is to inform you about the pilot NECAP Earth & Space Science tutorial that is taking place in your child's science class during the third quarter of this school year. The teachers participating in this pilot program are Mr. DaCosta, Mrs. Duarte, Mr. Levesque, Mr. McGinn, Mrs. Nicodemus, and Ms. West.

The NECAP Tutorial was created by Barrington High School teachers Mr. DaCosta and Mr. Levesque to review earth and space science content prior to taking the NECAP state assessment in May. The tutorial includes lecture notes, review games, review questions and an exam to aid students in evaluating their understanding in the earth and space science content. Anatomy, Chemistry 527, and Physics students will be given the tutorial as an assignment and expected to complete the exam component of the tutorial which will be graded as a third quarter assignment.

The NECAP Earth and Space Science Tutorial was created with the intention of providing every student with the opportunity to improve or refresh their knowledge of the earth and space science content. Please contact Mr. Joseph Hurley or Mrs. Diana Siliezar-Shields if you have any concerns regarding this assignment.

Sincerely,

Joseph D. Hurley  
Principal

Diana Siliezar-Shields  
Science Department Chair
